

# Burglars aren't the only threat to your home or business.

With Rottweiler Security monitoring, you can receive alerts, view video and notification alerts of all types of activity at your property - not JUST alarms.

With MySecurityDog.com you can create customized sensor alerts based on the specific activities and threats you want to monitor at your property. You can even specify time frames during which the notifications should be active, allowing you to get exactly the information you want, how you want, when you want it.

Medical Office at Main Street:  
The Supplies Cabinet was opened at 9:45 pm on Monday, August 27, 2007.

## Activity notification from the office...

Because of recent after-hours theft, Dr. Randals now monitors his clinic's medical supplies cabinet. He receives a text message alert if the cabinet is opened between 7:00 pm and 10:00 pm when he isn't at work, while others still have access to the building. Because these are medications, he also receives notification for loss of power.

## ...and from Your Home

Mr. and Mrs. Smith are notified by email at work if the liquor, paint, gun cabinet or other dangerous area is accessed between 3:00 pm and 5:30 pm Monday - Friday when the nanny is supposed to be watching their children at home.
